Internet Exchange Points Directory

The data provided in our Internet Exchange Points Directory is now accessible via our free interactive Internet Exchange Map. The map provides information for active Internet exchanges and buildings. Select an Internet exchange from the list provided to view the buildings in which that exchange is present. Or, select a building from the map projection to access data about the building, including its street address and a list of Internet exchanges present there.

The Internet Exchange Map is based on data compiled by TeleGeography, and is updated regularly to ensure that it is as accurate and as up-to-date as possible. Click here for more information about the map, or try it out at www.internetcxmap.com.

IXP Database

- A single canonical place for IXP data
- Development of IXP Database has started
- IXP data maintained by IXPs this ensures greater accuracy
- Useful for the IXP members to see IX data in context
- We want it to be open and pluggable

The plan

- Others will be able to mirror IXP Data

IXP Database

IXP DB API server written using Python / Django, which can:

- Get / create / update / delete IXP and Organisation objects
- All interaction is JSON
- All non-sensitive information will be publically available
- IXPAs (and others as appropriate) will be able to create, update and delete IXPs from the databases.
- All code is available on the Euro-IX GitHub repository <https://github.com/Euro-IX>
