Some Figures

CISCO Visual Networking Index

- Video traffic is predicted to reach **79% by 2018**

- **Three-fourths** of mobile traffic will be video **by 2019**

...which Raise Some Issues

User Experience

Infrastructural Support

Business Models

Data-driven Analysis

2 x [INFOCOM'2015], [WWW'2013]
2 x [Under Submission]

Sessions – 1.9 Billion

May 2013 – Jan 2014

Users – 32 M/month

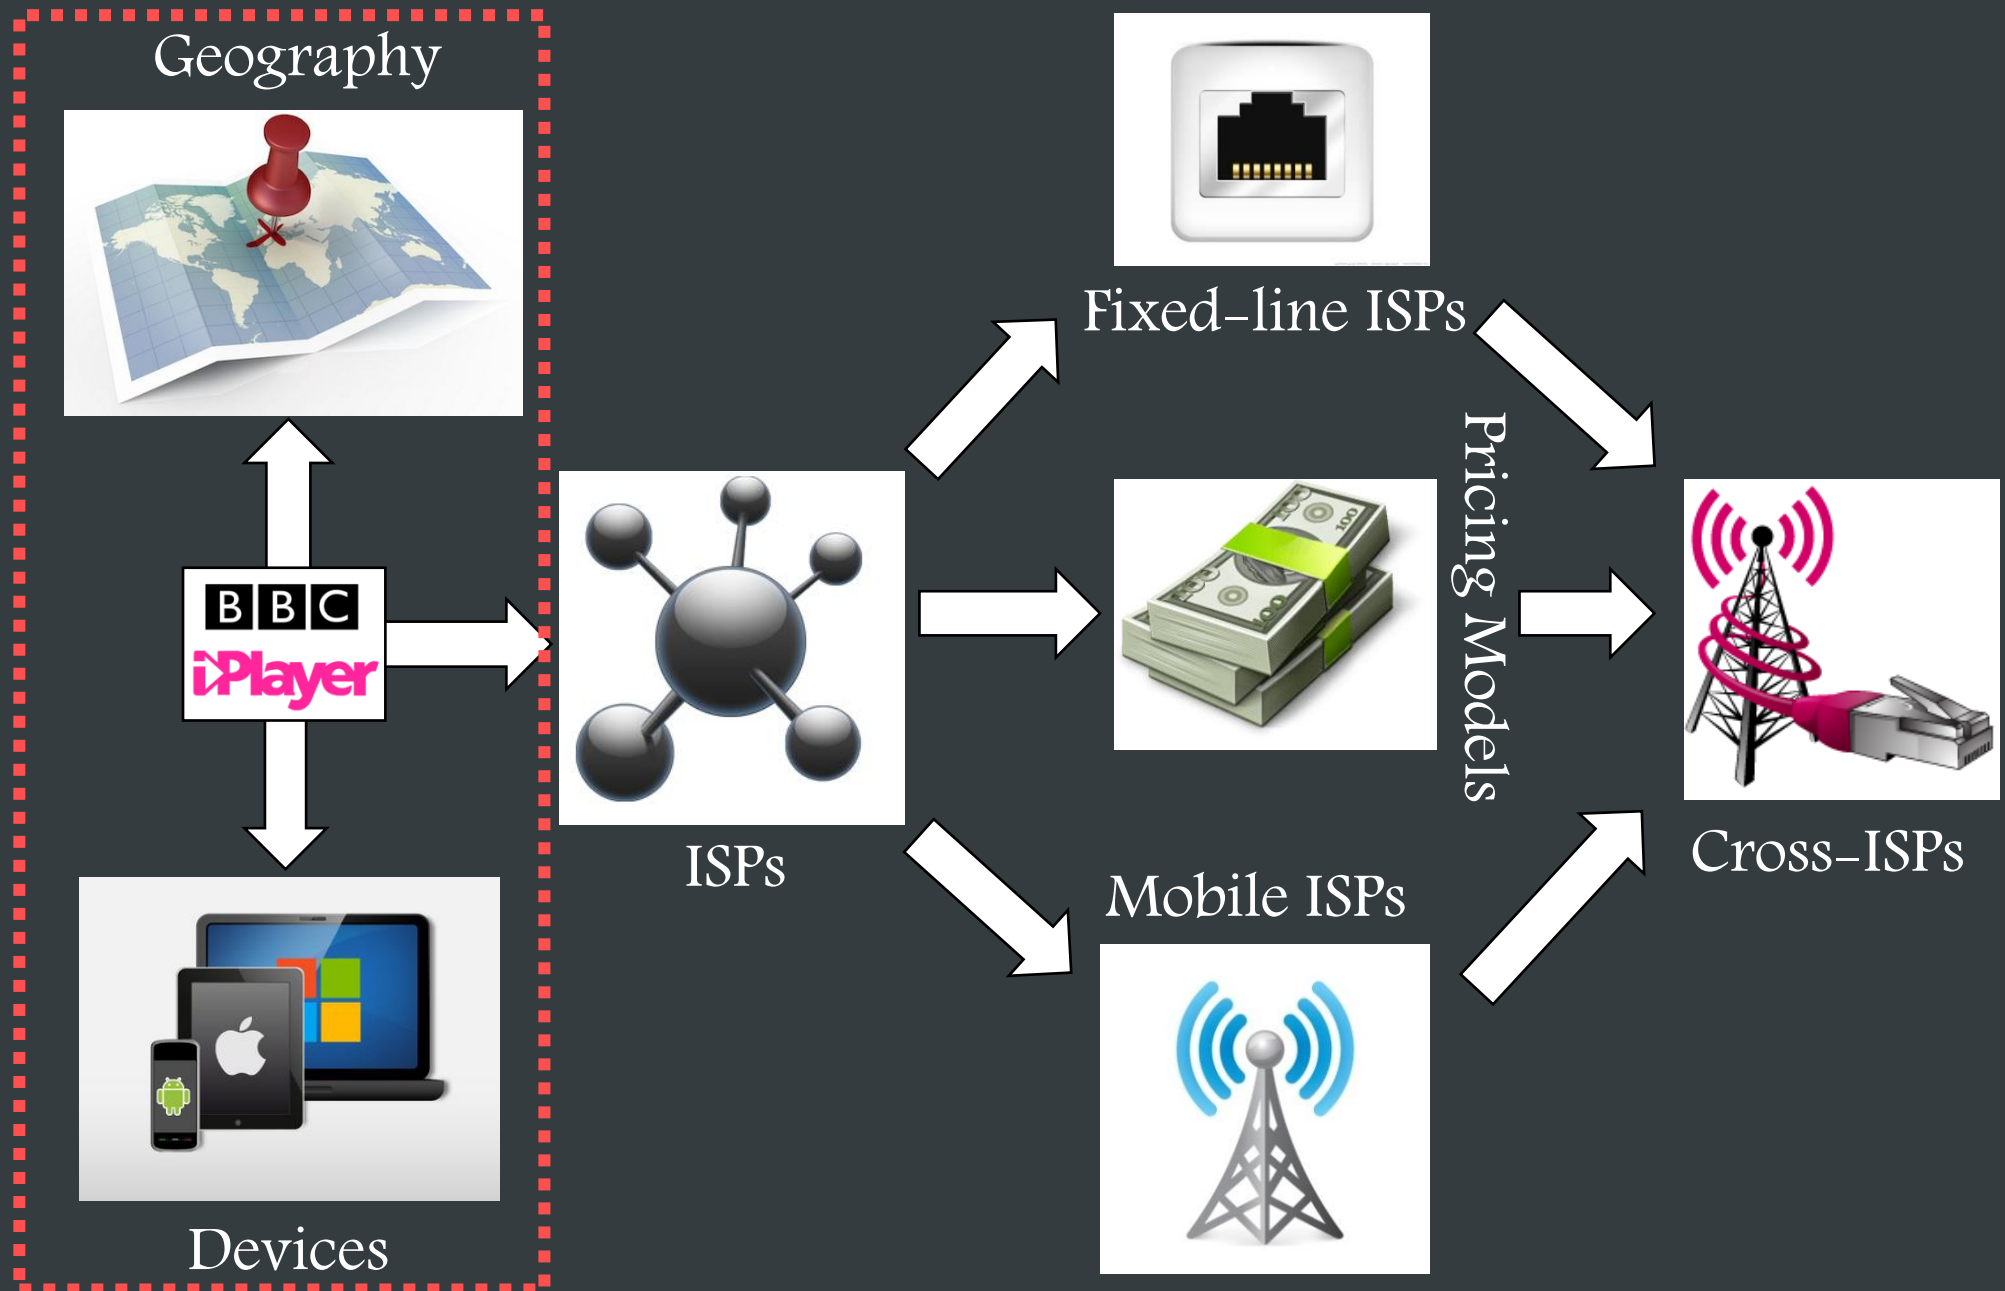

IP address – 20 M/month

≈ 50% of the UK population

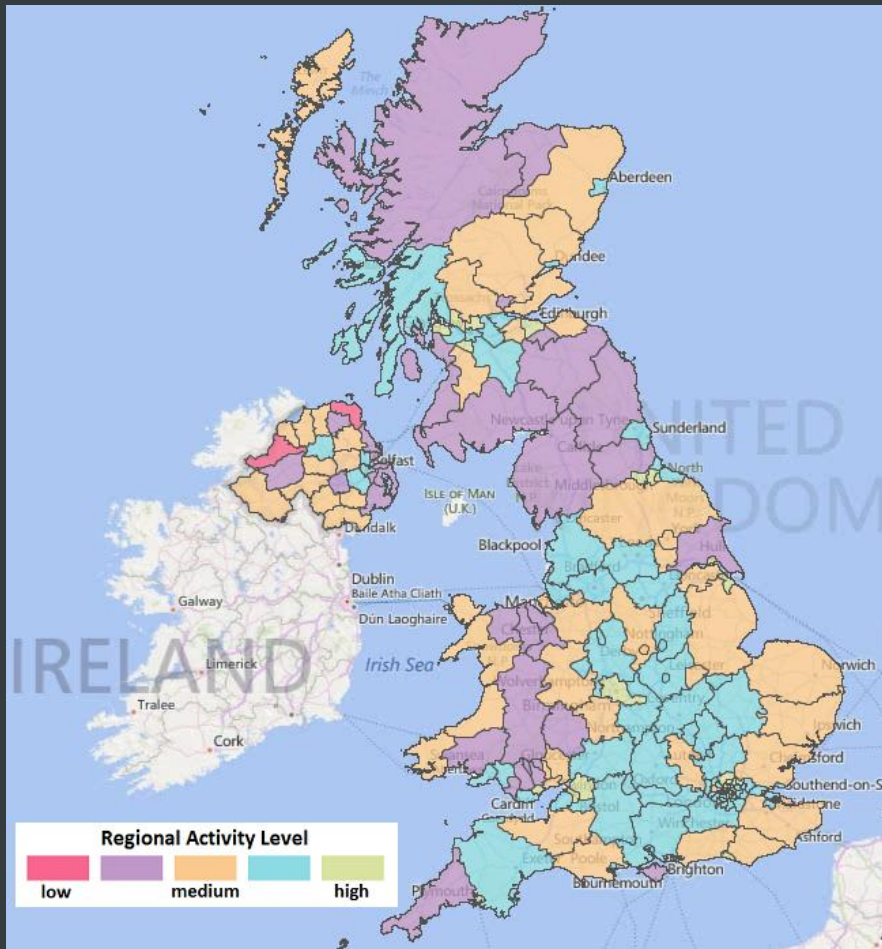

Roadmap

Geographic differences

Average per-user # sessions

Correlation with Ofcom statistics

Infrastructural support is important

Device-specific differences

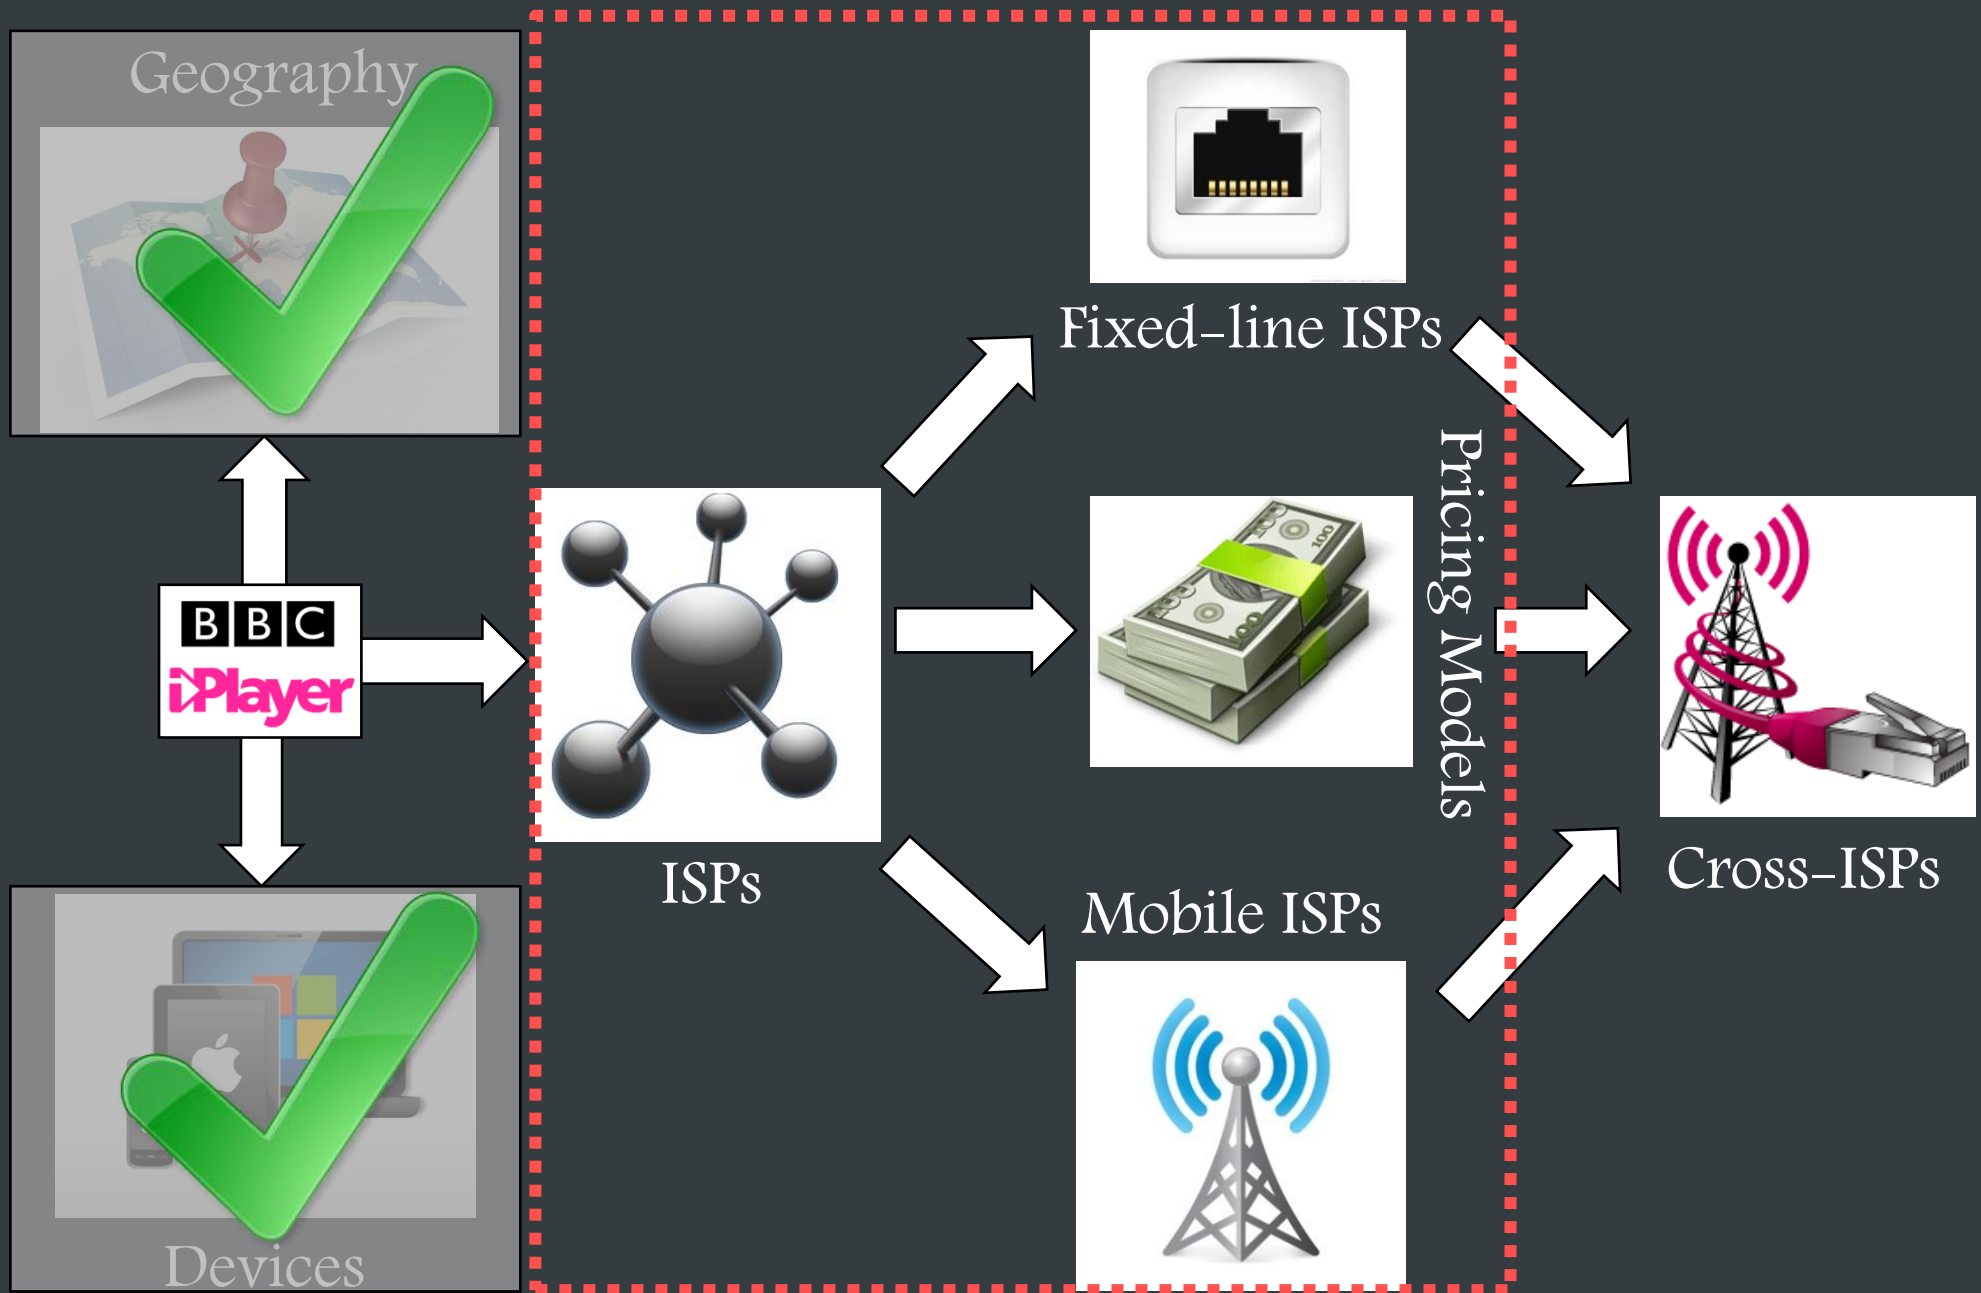

Daily volume of Live accesses

... jumps for mobiles during Wimbledon

Mobile consumption is affected by external events

Roadmap

ISP-level view

Fixed-line Internet market
(5 representative providers)

Mobile Internet market
(5 representative providers)

Mobile market is more dynamic than the fixed-line Internet market

Pricing Models

Limited-cap data packages

(M2 – M4)

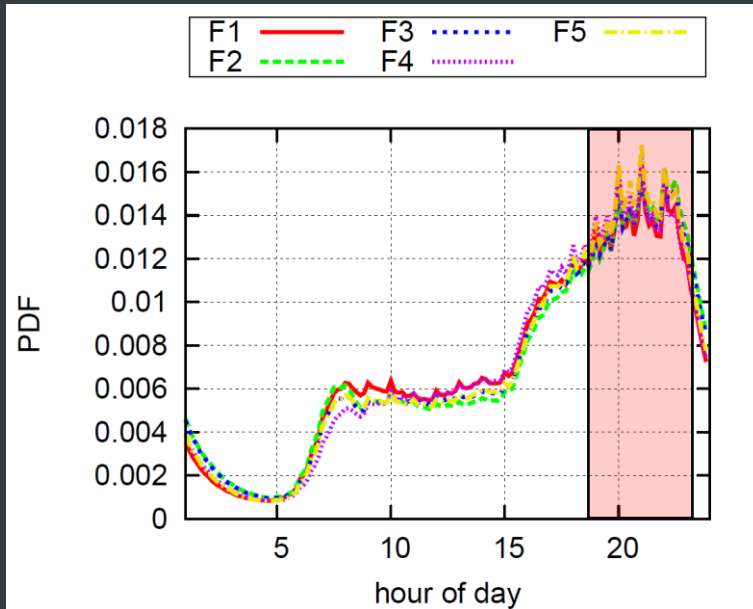

All-you-can-eat data

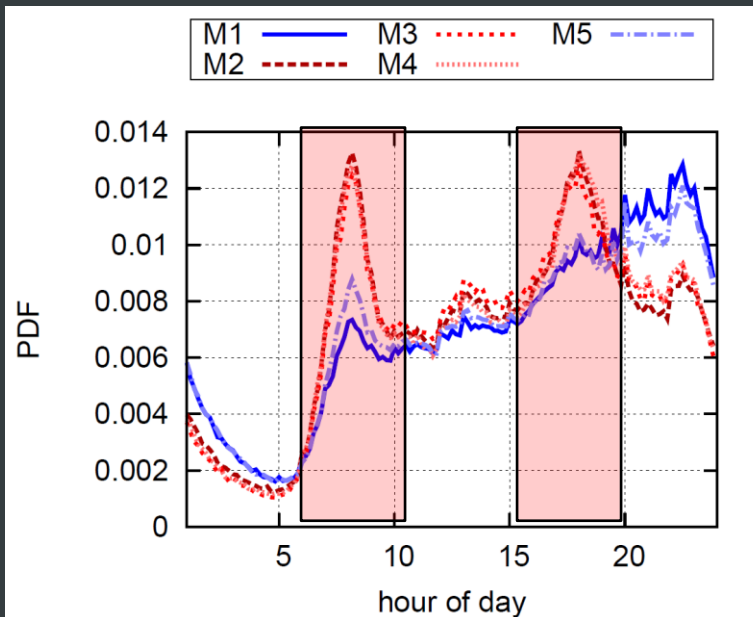

(M1, M5)

All-you-can-eat plans boost users' consumption

Behavioral Shift

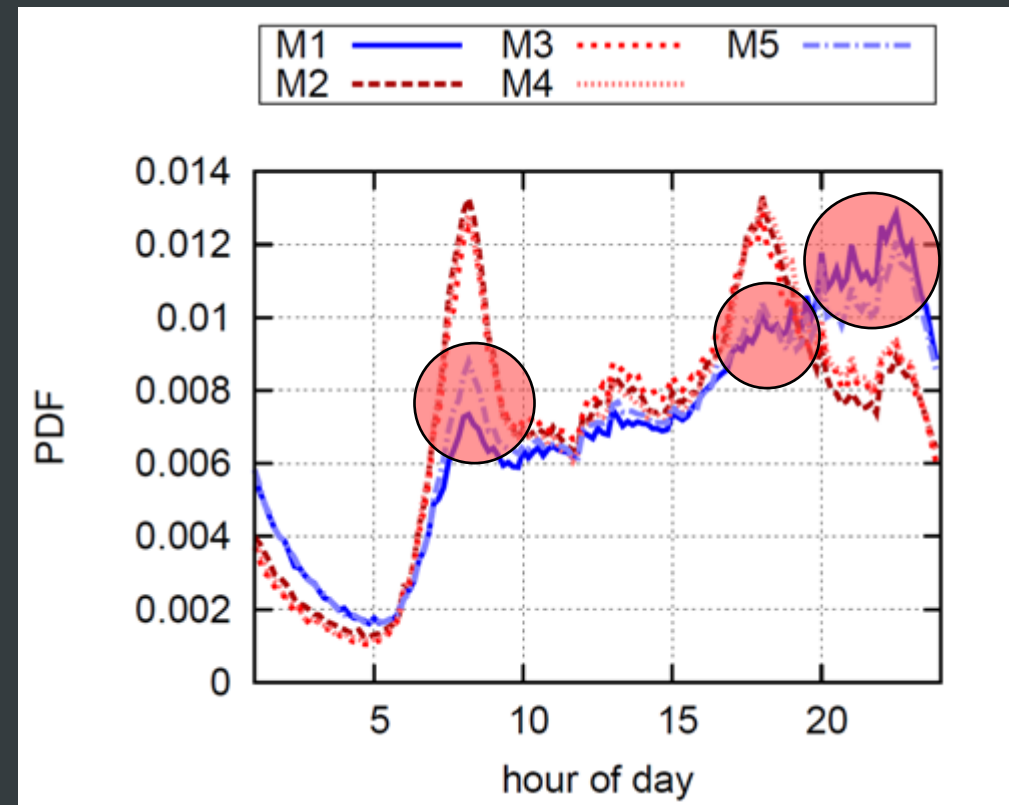

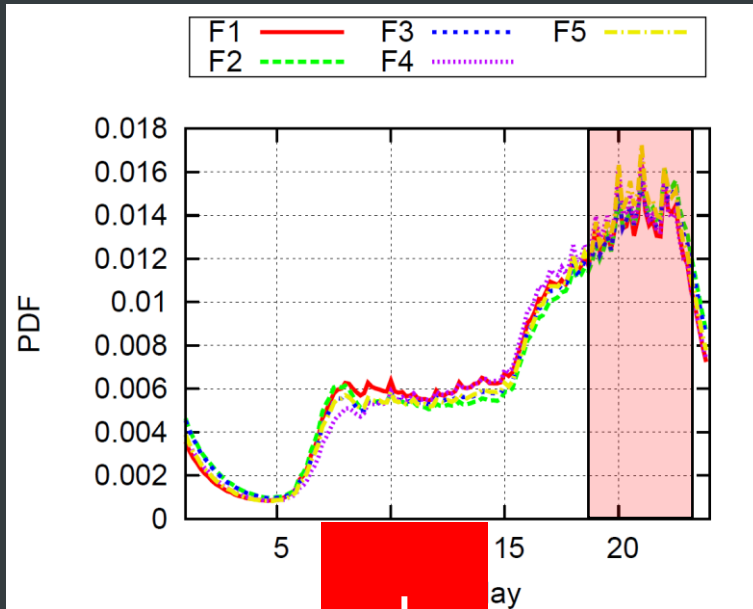

- Fixed-line accesses (F1–F5) peaks in the evening

- Limited data caps (M2–M4) peak in commute hours

Behavioral Shift

Unlimited data plans (M1, M5) is a superposition of both

Roadmap

Cross-ISP watching patterns

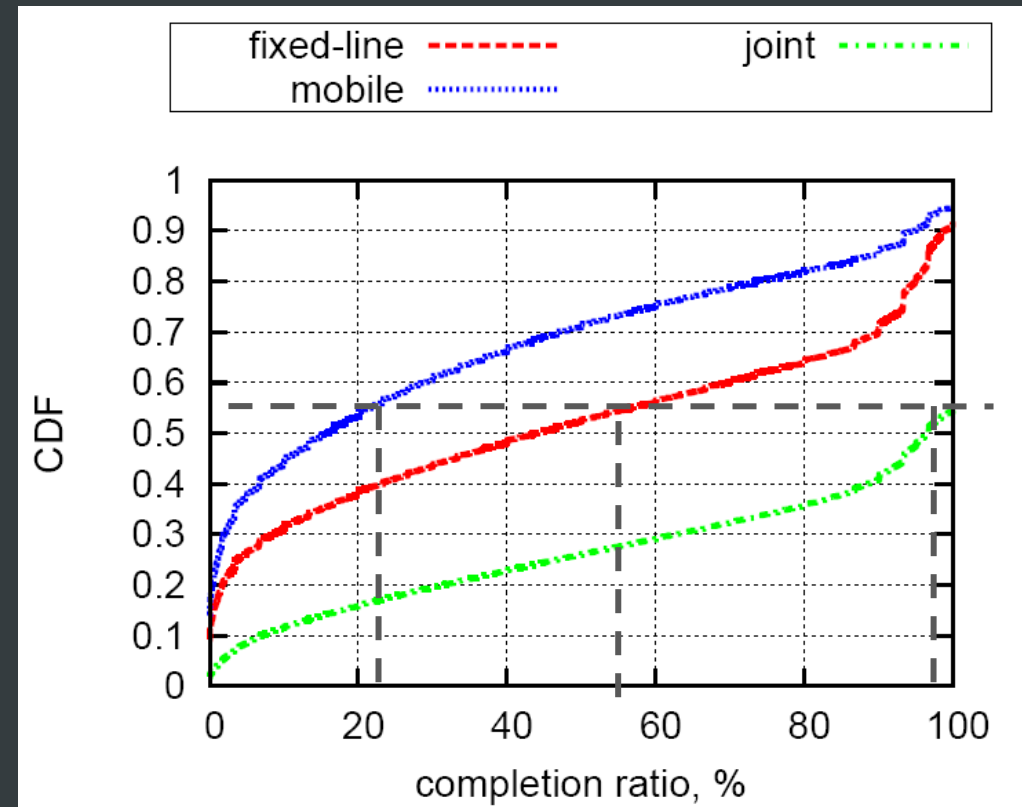

Completion across different ISPs

Fixed-line ISPs

Mobile ISPs

Users complete watching across different sessions and networks

Speculative Content Pre-fetching

Pre-fetch at home

Watch during commutes

Speculative pre-fetching can save up to 50% of mobile traffic

Conclusion

Infrastructural Support

Business Models

User Experience

- user engagement depends on the **level of infrastructural support**
- ... as well as on **pricing models**
- and there is a lot potential for **mobile content pre-fetching**
